3. Claims 1-8, 10-29 and 32 are pending.

Response to Arguments

Allowable Subject Matter

5. **Claims 1-8, 10-29 and 32 are allowed.**
6. The following is an examiner's statement of reasons for allowance: The present invention is directed toward a process control system providing security and verification functionality within a process control network. Each independent claim identifies the uniquely distinct features "**a security module analyzing information collected from a user at the same time a process control function is initiated and determine whether the process control function should be executed based on the analysis**". The closest prior art, He et al. (U.S. Patent No. 6,088,451) discloses a security system and method for securing access to network elements by user elements, wherein the network security server provides network security mechanisms to control access to the network elements and protect network resources and information, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
7. Therefore, **claims 1,11,18,20, and 29** and the respective **dependent claims 2-8,10-17,21-28, and 32** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
